

TIME ENTRY SCREEN

When entering time and if you have a variant set, your screen will not look the same. You should use these steps to correct the action:

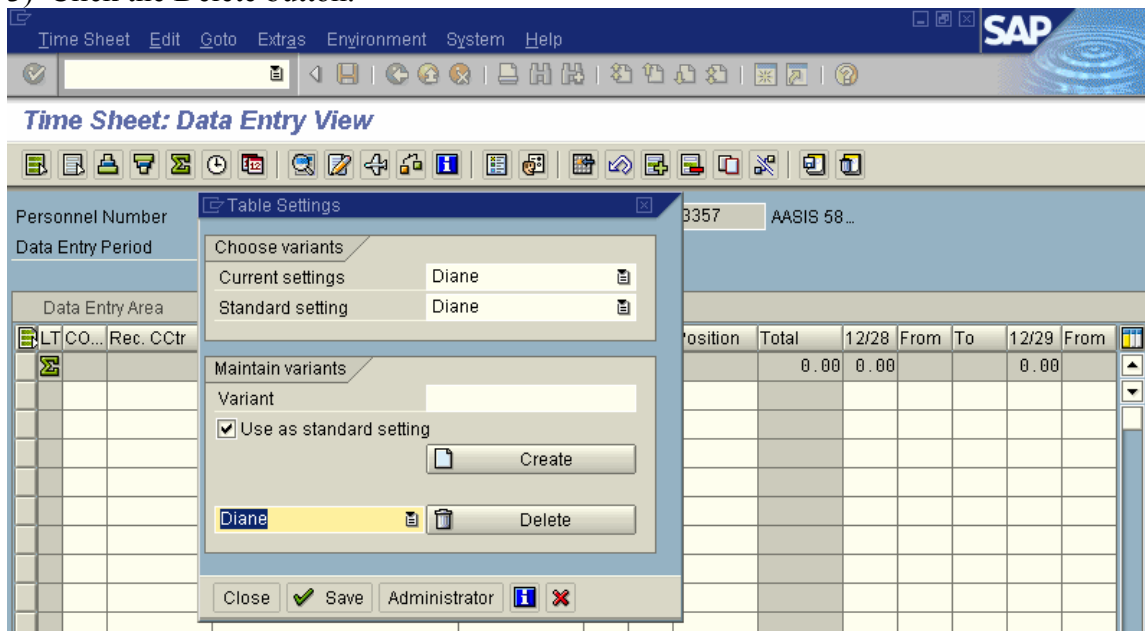

- 1) On the Time Sheet; Click on the Table Icon Setting .

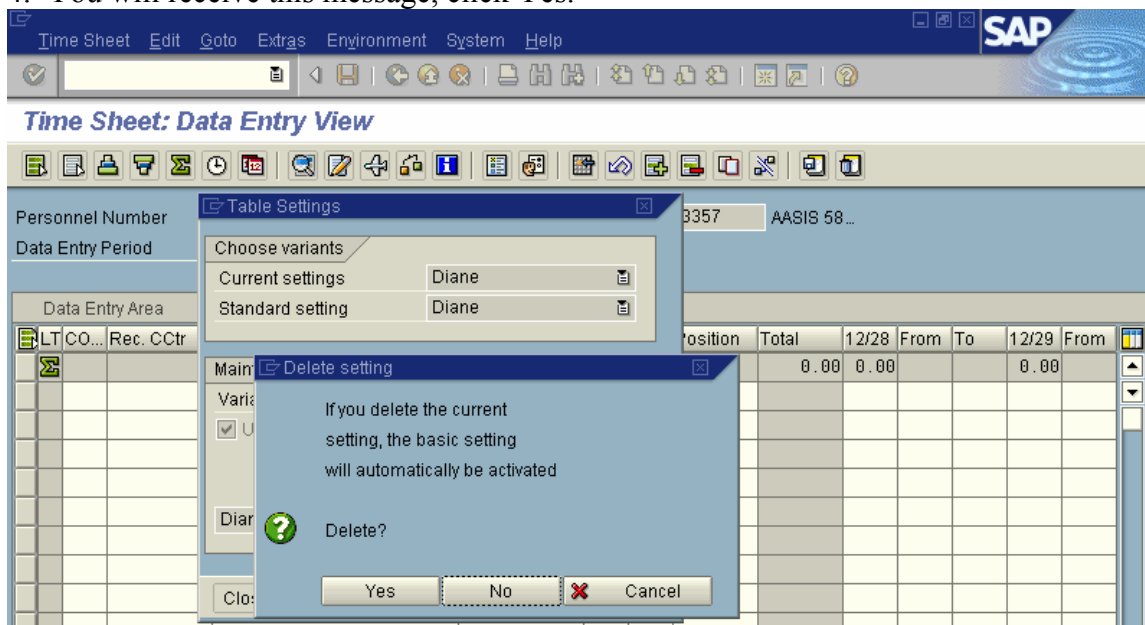

- 2) In the box across from the delete field, click on the drop down box and select your name.

3) Click the Delete button.

4. You will receive this message, click Yes.

The screenshot displays the SAP 'Time Sheet: Data Entry View' interface. A 'Table Settings' dialog box is open, allowing configuration of data entry variants. The dialog includes sections for 'Choose variants' and 'Maintain variants'. In the 'Choose variants' section, both 'Current setting' and 'Standard setting' are configured to 'Basic setting'. The 'Maintain variants' section features a 'Variant' input field (highlighted in yellow), a checked 'Use as standard setting' checkbox, and buttons for 'Create' and 'Delete'. The background shows a data entry grid with columns for 'Position', 'Total', and dates '12/28' and '12/29'. The status bar at the bottom indicates a message: 'Variant Diane was deleted'.
